

Wireless Network Penetration Test and Assessment

Scope

Deliver a penetration test for a Wireless Network and assessment of the configuration. This Pentest and Configuration assessment will be correlated and wrapped into report.

Maximum Numbers:

- 1x Wireless Network
- Vendors for Configuration Assessment – Cisco & Cisco Meraki, Aruba Wireless, Ubiquiti, Extreme

Benefits/Outcomes

Awareness for wireless security strengths and negatives against best practice and a report demonstrating the findings and recommendations for remediation

Assumptions

- Customer will not make any changes to the configuration during the testing window
- Pen-testing and Configuration assessment will be carried out onsite (England, Wales and Scotland only)
- Any remediation work is out of scope of this engagement however we can help via a follow-on engagement.

Deliverables

- Testing workshop with the customer to identify the testing approach and wireless details
- Perform the Wireless Pentest onsite
- Perform an assessment of Wireless Security configuration (8)
- Produce a report containing:
 - Timeframe of testing
 - Test Cases
 - Test Outcomes in risk/priority order and
 - The test results in priority and risk ordering
 - Recommended remediations
- Deliver a review workshop to review the test findings and recommended remediations

Cost

£6,385

Optional items

- Re-test after 3 months: £2,490
